REPORT 1: Competitor Research, Market Analysis & Complete Feature Specification

Document Version: 1.0 | Scope: Architecture & PRD | Target Platform: Flutter (iOS/Android) & Web
Generated: October 23, 2026 | Author: AdoptMatch Engineering & Research Team

1. EXECUTIVE SUMMARY & PLATFORM VISION

AdoptMatch is an ethical, technology-driven pet adoption, foster management, and animal welfare ecosystem engineered as a cross-platform **Flutter mobile application (Dart)** and responsive web companion. In developing countries and regional markets like Bangladesh, pet adoption is fractured across unverified social media groups and commercial classifieds (e.g., PetWorldBD), where commercial breeding and scams prevail. Conversely, international platforms (e.g., Paaw) offer sophisticated behavioral matching quizzes, and progressive local networks (e.g., PetFellow) pioneer 100% free adoptions and veterinary verification.

AdoptMatch synthesizes the strongest methodologies from these benchmark platforms while solving their structural weaknesses. It introduces an **algorithmic compatibility engine (Swipe & Match UI)**, verified multi-tier user governance, **digital Pet Health Passports with scannable QR tags**, real-time geolocation emergency lost-pet SOS broadcasts, and a complete Foster-to-Adopt life-cycle framework.

100% Free	Verified	Dual Engine	24/7 SOS
Core Adoption Policy	Shelter & Vet Checks	Quiz + Swipe Matching	Geo-Fenced Alerts

> **Architectural Directive:** AdoptMatch strictly adheres to an ethical pet adoption policy—direct animal sales or commercial breeder transactions are strictly prohibited. The platform sustains operations through premium veterinary utilities, verified organizational toolkits, sponsored animal supply partnerships, and opt-in micro-donations.

2. IN-DEPTH COMPETITOR AUDIT & BENCHMARKING

A rigorous empirical study of three core reference benchmarks informed AdoptMatch's functional design:

A. Paaw (United States / International Shelter Hub)

Model & Discovery: Paaw acts as a centralized directory connecting prospective pet owners directly with non-profit animal rescue shelters across North America. Key features include an interactive matching quiz exploring lifestyle fit (*Team Dog vs. Team Cat*, existing pets, apartment living) and curated search buckets: *Closest, Puppies & Kittens, Waiting the Longest, Small & Apartment Ready,* and *Good for Kids*.

Monetization & Pricing: Adoption search is 100% free for users. Revenue is driven via corporate sponsorship and affiliate monetization: an exclusive partnership with *Chewy* (food, toys, crates, litter with $20 discount vouchers), co-branded pet insurance with *Odie Pet Insurance*, and shelter donation processing.

Identified Gaps: Paaw relies on external shelters to manage adoption applications, lacks real-time mobile in-app chat, provides no post-adoption medical reminder utility, and does not support foster care workflows.

B. PetFellow (Bangladesh — Pet Care & Adoption Ecosystem)

Model & Ethics: PetFellow establishes a trusted regional pet care ecosystem grounded in **100% free pet adoptions** with zero hidden charges. It provides an end-to-end welfare network: verified, licensed veterinary professionals, background-checked service providers, and a structured **Foster-to-Adoption** pathway for rescued animals.

Care & Community Utilities: Integrated direct messaging between adopters and foster parents, an active community feed with specialized groups (including *Lost & Found Pets*), smart automated reminders for vaccinations and medical treatments, and a 24/7 emergency support directory (poison control, critical care, and clinic routing).

Monetization & Pricing: Premium vet care booking with a 100% satisfaction money-back guarantee, PCI DSS-compliant payments, and insurance coverage options.

Identified Gaps: Lacks algorithmic compatibility scoring, swipe-based discovery UI, digital e-signed adoption contracts, and offline QR-coded health passports.

C. PetWorldBD (Bangladesh — Online Classifieds Marketplace)

Model & Coverage: A broad classifieds platform facilitating listings across domestic pets (dogs, cats), birds, fish, rabbits, and livestock. Provides location filtering across all major divisions (Dhaka, Chittagong, Sylhet, Khulna, Rajshahi, Rangpur, Mymensingh) with OTP-based email verification.

Monetization & Pricing: Basic ad submissions with paid pricing plans for premium exposure (Featured Ads).

Identified Gaps: High prevalence of commercial breeders and unvetted listings, no health history or vaccination tracking, absence of adoption contracts, and no safety mechanisms for animal welfare.

3. COMPETITOR COMPARISON MATRIX

Feature Domain	Paaw (US)	PetFellow (BD)	PetWorldBD (BD)	AdoptMatch Opportunity
Adoption Cost	Free (Shelter link)	100% Free (Ethical)	Paid/Free Classified	**100% Free Verified Adoption**
Discovery UI	Quiz & Filter Lists	Search & Listing Cards	Classified List Grid	**Tinder Swipe + AI Quiz**
Foster Care	Not Available	Foster-to-Adopt Flow	Not Available	**Full Foster Life-Cycle & Logs**
Health Tracking	Static Blog Advice	Smart Push Reminders	Not Available	**QR-Code Digital Pet Passport**
Emergency SOS	Not Available	24/7 Emergency Clinic	Not Available	**Geo-Fenced 5-10km SOS Broadcast**
In-App Messaging	External Redirect	Real-time Chat	Phone/Email Only	**End-to-End Encrypted Chat**
Verification	Shelter Partner Vetting	Background Checks	Email OTP Only	**Govt ID (NID) + Shelter Audits**
Digital Contract	External Shelter Paper	Not Available	Not Available	**In-App E-Signature & Custody Doc**
Monetization	Affiliate (Chewy/Odie)	Premium Services	Featured Ad Pricing	**Freemium Gold, Shop & Donations**

4. ADOPTMATCH COMPLETE FEATURE SPECIFICATION

4.1 User Roles & Permission Hierarchy

AdoptMatch implements a strict Role-Based Access Control (RBAC) model across four key actor personas:

Role Persona	Key Capabilities	Verification Level
Adopter	Complete matching quiz, swipe & bookmark pets, submit digital adoption applications, execute e-contracts, maintain Pet Passport, and participate in community feeds.	Mobile OTP & Email + Optional NID
Shelter / Rescue Org	Manage organization profile, post unlimited animal profiles, manage foster assignments, review & score applications, schedule home visits, and accept donations.	Mandatory Org License / Admin Audit
Foster / Volunteer	Manage temporary foster availability, update assigned animal health logs, coordinate trial adoption periods, and report lost/found rescues.	Shelter Invitation & Phone Verification
Super Administrator	Approve shelter registrations, moderate community feeds and pet listings, resolve disputes, oversee payment payouts, and audit system security logs.	Multi-Factor Authentication (MFA) Protected

4.2 Functional Module Breakdown

Module A: Discovery & Smart Matching Engine

- **Interactive Compatibility Quiz:** 5-question multi-step quiz evaluating housing environment (apartment vs. yard), household children, existing pets, daily work hours away from home, and pet parenting experience.
- **Tinder-Style Swipe Interface:** Dynamic gesture-based card swiping (Right = Favorite/Match, Left = Pass, Up = Super-Favorite/Notify Shelter).
- **Advanced Behavioral Filters:** *Apartment Friendly, Kid-Safe, Spayed/Neutered, House-Trained, Hypoallergenic, Special Care, Waiting the Longest*.
- **Proximity Discovery:** Device GPS integration sorting animals within custom distance radii (5km, 15km, 50km, Nationwide).

Module B: Adoption & Foster Life-Cycle Workflow

- **Standardized Digital Application:** Comprehensive questionnaire covering lifestyle, landlord permissions, household demographics, and emergency care budget.
- **Shelter Application Portal:** Kanban-style review dashboard (Pending Review, Home Visit Scheduled, Trial Foster, Approved, Rejected).
- **Foster-to-Adopt Transition:** 14-to-30 day supervised trial fostering period with milestone check-ins before permanent legal handover.
- **E-Signature Adoption Contract:** Automated PDF generation of legally binding pet custody agreements signed in-app via touch signature.

Module C: Digital Pet Health Passport & QR System

- **Unified Medical Locker:** Lifelong record repository for vaccination histories (Rabies, DHPP, FVRCP), deworming dates, and prescription files.
- **Smart Medication & Booster Reminders:** Automated background push notifications for upcoming vaccination boosters and recurring medications.
- **Scannable Collar QR Tag:** Each pet profile generates an encrypted QR code. Anyone scanning the collar tag with any mobile browser accesses emergency owner contact info and critical allergy warnings.

Module D: 24/7 Emergency & Lost-and-Found SOS

- **Geo-Fenced Lost Pet Alert:** When a pet is marked lost, instant high-priority push notifications and broadcast alerts are dispatched to all users within a 5-10 km radius.

- **Interactive Emergency Clinic Directory:** Real-time mapping showing the nearest open 24/7 veterinary hospitals, animal blood banks, and poison control hotlines.
- **Found Pet Reporting:** Photo-matching and community sighting pinboard to quickly reunite lost pets with verified owners.

Module E: Secure Communication & Community Ecosystem

- **In-App Masked Chat:** Real-time WebSocket/Firebase messaging between adopters, fosters, and shelters with private phone number protection.
- **'Happy Tails' Social Feed:** Adoption success stories, verified post-adoption photo journals, and community pet parenting advice.
- **Regional Community Groups:** Location-based discussion groups (e.g., Dhaka Dog Rescue, Chittagong Cat Lovers) for peer support.

Module F: Ethical Monetization & Transparent Giving

- **Verified Rescue Crowdfunding:** Direct micro-donations dedicated to medical care for injured stray animals with real-time expense reporting.
- **AdoptMatch Gold (Adopter Premium):** Early 24-hour access to high-demand rescue listings, ad-free experience, unlimited compatibility analyses, and 1 free monthly tele-vet consultation.
- **Shelter Spotlight Boosts:** Modest fee for shelters to feature urgent senior pets or special-needs rescues at the top of discovery feeds.
- **Pet Supply Affiliate Hub:** Curated partnerships for new pet starter kits (carriers, leashes, premium food, litter).

5. MVP VS. FUTURE ROADMAP PRIORITIZATION

Functional Area	Phase 1: MVP Core	Phase 2: Advanced Expansion	Phase 3: Scale & Ecosystem
Discovery & Matching	Quiz + Radius Search + Grid / Swipe UI	AI-weighted affinity scoring engine	Live shelter webcam streams & AR size preview
Adoption Processing	Digital Application + In-App Review Flow	In-App E-Signature & Document Vault	Automated municipal pet registration sync
Health Records	Vaccine log & local reminder alerts	QR Code Collar Tag generator	Direct API sync with veterinary clinic PIMS
Communication	1-on-1 WebSocket chat + notifications	Voice notes & shelter video screening	AI automated initial screening assistant
Emergency & SOS	Lost pet community bulletin board	Geo-fenced 5km radius push broadcasts	GPS smart collar Bluetooth/Cellular telemetry
Monetization	Voluntary rescue micro-donations	AdoptMatch Gold tier & Featured Boosts	Full e-commerce pet pharmacy & insurance hub

6. NON-FUNCTIONAL & TECHNICAL REQUIREMENTS

- **Performance:** Flutter cold app launch time must remain under 2.0 seconds on standard Android/iOS devices. List scrolling must maintain 60 FPS using virtualized viewports and memory-cached images (CachedNetworkImage).
- **Security & Encryption:** All client-server transit encrypted over HTTPS/TLS 1.3. User passwords hashed using BCrypt (factor 12). Personally identifiable documents (NID, home lease proofs) stored in encrypted, private cloud buckets accessible only via short-lived signed URLs.

- **Privacy by Design:** Adopter contact details are masked by default. Shelters and adopters communicate entirely through the in-app chat until physical handover is formally scheduled.
- **Offline Resilience:** Local persistence (Hive / Isar) caches pet profiles, saved matches, and the Digital Health Passport so that medical data is instantly available without active internet connectivity.
- **Bilingual Accessibility:** Native internationalization (i18n) supporting complete Bengali (Bangla) and English interfaces, with full RTL/LTR text support and WCAG AA contrast compliance.

7. CORE USER JOURNEYS & ACCEPTANCE CRITERIA

Primary Journey: End-to-End Adoption & Passport Activation

[Splash & Language Select] [Register via Phone OTP] [Complete Lifestyle Quiz] [Browse Matches / Swipe Card] [View Pet Details & Health Badge] [Submit Adoption Form] [Shelter In-App Review & Chat] [Home Visit / Trial Foster] [E-Sign Custody Contract] [Health Passport Transferred] [Post to 'Happy Tails']

> **Formal Acceptance Test — Adoption Application Workflow:**
> • **GIVEN** an authenticated adopter viewing an available pet profile with verified medical tags,
> • **WHEN** the adopter taps 'Apply for Adoption', completes the multi-step questionnaire, and taps 'Submit',
> • **THEN** the system validates all required fields, creates an application record with status 'Pending Review', dispatches an instant FCM push notification and email to the shelter manager, and updates the adopter's dashboard with a real-time status tracker.
